

# HMI Data Sharing

## Data Sharer

- 16 HMI at most enable to proceed data sharing via network or RS485
- Support 256 Words data sharing
- Enable to accelerate the information of HMI exchange data inside the network
- RS485 measured distance: 1100M
- Simple information setting achieves data sharing

## Application Occasion

Data Sharer can be applied in various kind of controlling systems.

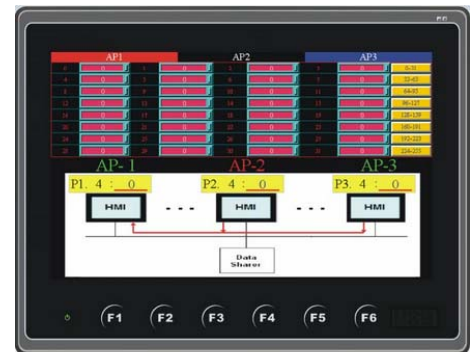

For example :

### Multi-axis control system :

Need to synchronously confirm the information of motors working what makes motors confirm the location mutually; To avoid accidents and increase the safety of machines.

### Central monitor system :

Central HMI system can synchronously monitor 15 machines Whether the information is abnormal.

## Application Technology

Simulate the cloud integration computing function and make all online HMI data proceed online sharing.
